

Curriculum Map: Accounting I
Meadville Area Senior High School
Business Department

Course Description: This year long elective course is designed for students in Grades 10-12 and will provide a solid foundation for students who seek preparation for entry-level accounting jobs, look forward to careers in related business fields for which knowledge of some accounting is needed or those who seek a foundation on which to continue studying business and accounting at the collegiate level. The complete accounting cycle in its simplest form is presented, and students learn the basic procedures used to operate a business. Students will be taught how to analyze and record business transactions and prepare financial statements, as well as preparing payroll records. Using manual skills, students perform tasks to complete an entire accounting cycle for service businesses organized as proprietorships and for merchandising businesses organized as partnerships.

Unit Title:

Accounting for a Service Business Organized as a *Proprietorship*

Suggested time frame:

18 weeks

Standards:

- 15.1.12.A** Summarize professional designations, careers, and organizations within the field of accounting, including education and certification requirements.
- 15.1.12.B** Analyze the roles of policy-setting bodies in the accounting profession, e.g., American Institute of Certified Public Accountants (AICPA), Pennsylvania Institute of Certified Public Accountants (PICPA), Generally Accepted Accounting Principles (GAAP), and Securities and Exchange Commission (SEC).
- 15.1.12.C.** Analyze business transactions using T-accounts to determine their impact on a business
- 15.1.12.D.** Analyze, journalize, and post transactions to general and subsidiary ledgers.
- 15.1.12.L.** Describe and explain the criteria used to determine expenses and journalize the expense transactions.
- 15.1.12.N** Explain how the different forms of business ownership and business operations are reported on financial statements.
- 15.1.12.P** Analyze and perform the reconciliation of accounts
- 15.1.12.Q** Prepare financial statements (including a Balance Sheet, Profit & Loss and Owner's Equity) and understand their relevance
- 15.1.12.S.** Analyze and perform a horizontal and vertical analysis of the income statement and balance sheet.
- 15.1.12.U** Assess capital structure by calculating and interpreting financial ratios
- 15.1.12.V** Analyze and explain the use of industry averages in assessing the financial condition, operating results, profitability, liquidity, and capital structure
- 15.1.8.C** Identify the components of the accounting cycle.
- 15.1.12.E.** Perform accounting functions using technology as a tool.
- 15.1.12.Y.** Determine and calculate taxable income and tax liability for both personal and business taxes.

Big Idea:

Accounting is a process for recording, analyzing, and reporting financial transactions that have a significant impact on the quality and integrity of business and personal decisions.

Essential Questions:

What are students' options for particular careers in accounting, education and certification requirements, and within organizations?

What are the professional and governmental agencies that set policies in the field of accounting?

How can students analyze business transactions using T-accounts to understand their impact on a business?

What procedure can students follow to analyze, journalize, and post transactions to general and subsidiary ledgers?

How can students determine the different expenses and journalize those transactions?

What are the different financial statements and how are they reported according to the sole proprietorship?

How will students reconcile accounts in a cash control system?

How will students prepare financial statements and explain their relevance?

Competency	Vocabulary	Strategy	Resource
<ul style="list-style-type: none"> • Demonstrate an understanding of the fundamental accounting principles (GAAP) by classifying items as assets, liabilities or owner's equity. • Identify and explain classification of accounts within assets, liabilities, and owner's equity (capital, revenue, expenses) • Explain how and why accounting principles provide guidance and structure for preparing financial statements. • Analyze business transactions using source documents and the effect on the accounting equation • Apply the double-entry system of accounting to record business transactions for different types of business ownership • Apply principles of Accrual Accounting to prepare a Trial Balance, recording adjusting 	Asset, liability, owner's equity, GAAP, accounting equation, service business, merchandising business, proprietorship, partnership, corporation, transaction, account, account balance, account title, capital, balance sheet, revenue, sale on account, expense, withdrawals, debit, credit, normal balance, T account, chart of accounts, journal, journalizing, entry, general journal, source document, double-entry accounting, invoice, sales invoice, memorandum, ledger, general ledger, account number, file maintenance, opening an account, posting, endorsement, blank endorsement, special endorsement, restrictive	Chapter information outlines, graphic organizers, demonstration, class discussion, independent mastery, formative assessment, summative assessment, Automated Accounting Online	Textbook Working papers Graphic organizers Calculator Computer Internet access
